-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2124

1. The abstract of the disclosure is objected to because superfluous language and legal phraseology are used in this paragraph (i.e., "[t]he invention provides" and "comprising"). Correction is required. See MPEP § 608.01(b).

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.⁷

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Abraham et al '346.

As per independent claim 1, Abraham et al disclose, e.g., see Figs. 4 & 7, the invention substantially as claimed. Fig. 7 shows the "partial correlation" and combining for providing the "full convolution result". It is noted that Abraham et al do not specifically detail the "**superimposing** the partial solution vectors" feature; however, such feature is implicitly disclosed from the Figure and the corresponding recitation because the "full convolution result" of Fig. 7 is the same as because the "full convolution result" of Fig. It would have been obvious to a person having ordinary skill in the art at the time the invention was made to design the claimed invention according to Abraham et al's teachings because the reference is a convolution devices having "multiple data chunks" as claimed.

As per dependent claims 2-13, the detail features are obvious to a person having ordinary skill in the art.

Due to the similarity of claims 14-15 to claim 1, they are rejected under a similar rationale.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cited references are art of interest.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan V. Mai whose telephone number is (703) 305-9761. The examiner can normally be reached on Tue-Fri from 6:30am to 5:00pm.
